**Academic Project**

### 1) Mytournament.com

We are developing a website project "mytournament.com" which is helpful for the both Organization and Participant. This project is based on Chess Competition. Organization has two types one is Trust and other is Personal. This website is basically for local Chess Competition Organization and Participant. The local area Organization cannot create tournaments by using website or cannot publish on the website that's why we are developing this website.
**Technology and framework:** Net beans, JSP, JavaScript, Servlet , Html, Bootstrap ,CSS.
**Database:** Oracle 10g.

### 2) Cropbusinessman.com

We are developing a website project "Cropbusinessman.com" which is helpful for the both Farmer and Businessman . This project related to crop and their products. By using this website Businessman can store is product and display. For the further solving farmers queries Businessman can provide Agro guide. Farmer can see Products and their Rates and apply for it. Company Can see the Product of Businessman and send Order to Businessman.
**Technology and framework:** Visual Studio**,** ASP.Net, Html, Bootstrap ,CSS.
**Database:** SQL Server .

**Internship Project**

### 1) Carat55

**My Work:** In this project I handled whole project and worked on HR, Account, Selling, Buying Module by using frappe framework and write custom script on each module.  we have use One ERPNext application for Implantation of above module. Also work on print format, create api, update api, delete api, get api and script report.We have develop own support module for all department including email alert.

We also developing a website for carat55 for the purpose of advertisement and Customer can view items through our website. In this website we can fetch the ERPNext data into our website.After that Customer can view the items details with its price. In this website we can provide enquiry form for asking Information through email or by call.

**Technology and framework:** Python ,Angular JS,Frappe, ERPNext, MariaDB, CSS, JavaScript, JQuery and Bootstrap

**Role :** Software Developer
